Key benefits

Mandriva Mini Benefits

- Fast development, quick introduction
- High level of customization according to market needs
- Small footprint
- Enhancement of your margins
- Mandriva Linux: the most robust and simple Linux solution on the market

Mandriva Mini was developed by Mandriva to offer advantages both to the OEM partners and the final users.

- Based on Linux, it **reduces the costs of production** and provides OEM partners with exclusive tools to **tailor their products** precisely to their needs.
- The final users benefit from **Mandriva Linux robust, easy to use and performant** distribution, and access multiple applications chosen by the manufacturer.

Simple and efficient

With its **intuitive and user-friendly graphical interface**, Mandriva Mini brings you a general flexibility to surf through the Web, look at your photos, watch movies, create your documents, listen to your music...

Mandriva Mini also provides you with the **simplicity of use and stability** of the Mandriva Linux distribution, internationally recognized for more than 10 years now.

Available in more than 80 languages, Mandriva Mini has a **very small footprint** and is interoperable with Windows. Since 2001, we are working with majors actors of the market like Dell, HP, NEC, EMTEC... and we have signed numerous agreements to pre-install and manage Linux on their machines. Mandriva also participates with Intel on thematic projects like the Classmate PC.

Innovative

Mandriva Mini introduces exclusive features to increase the innovation and performance of your product. **Our Faster Boot solution** offers you a light system consisting of the main functionalities, in order to be immediately operational. Your customers will be able to start their computer in less than 10 seconds.

Mandriva Mini includes essentials like Office Suite, music and pictures managers, but also Google and Educational stacks, Internet applications (Skype, Firefox) and many other features that will transform your computer into a complete, performant and attractive machine.

Customizable

With Mandriva Mini, you can **customize the interface**, the desktop and the appearance of your platform according to your specific local market and product needs. You have at your disposal a **catalogue of 20 000 applications** to choose from. You can thus entirely set up your platform with what you really want.

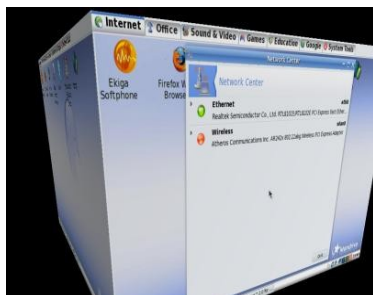

Exclusive features

- Optimized boot sequence
- More than 20 000 applications
- Educational Pack
- More than 80 languages
